

Summary of the Data

	sl_no	ssc_p	hsc_p	degree_p	etest_p	mba_p	salary
Mean	108.0	67.3	66.33	66.37	72.1	62.28	288655.41
Median	108.0	67.0	65.0	66.0	71.0	62.0	265000.0
Mode	1	62.0	63.0	65.0	60.0	56.7	300000.0

This table shows the Mean (average), Median (middle value), and Mode (most frequent value) for the Placement dataset that contains students' or employees' information with the following columns:

sl_no – Serial number or ID
ssc_p – 10th grade (SSC) percentage
hsc_p – 12th grade (HSC) percentage
degree_p – Graduation percentage
etest_p – Employability test percentage
mba_p – MBA percentage
salary – Salary offered

Key Observations

1. The average SSC score is about 67.3%, and the HSC score is 66.33%, meaning most students are in the first-class range.
2. The mean and median for SSC, HSC, and degree are very close, which means the scores are fairly evenly distributed without extreme outliers.
3. The degree percentage is similar, around 66.37%, showing consistent academic performance.
4. The MBA percentage is slightly lower at 62.28%, which may indicate that MBA scores vary more among candidates.
5. The average employability test score is 72.1%, which is higher than academic scores, suggesting Most candidates perform better in employability tests than in academics.
6. The average salary is ₹2,88,655, and the median salary is ₹2,65,000, which means half of the people earn below ₹2.65 LPA and half earn above it. The mode salary is ₹3,00,000, showing this is the most common package offered.
7. Salary mean is higher than the median, suggesting most people getting around ₹2.65–3.0 LPA, and a few higher salaries increase the average.
